

Starting **July 1st 2012** the Maryland Motor Carrier Division will start its **Electronic Permitting Program**, which allows customers to display permits and attachments on an electronic device (ie smartphones, iPads, laptops etc). Permits may be emailed or sent electronically in pdf format. Upon request the vehicle operator must immediately be able to retrieve and display an image of the permit. Failure to do so will result in violation of E-permit policy. This is an OPTION, and is **NOT** mandatory. Customers may continue to carry printed hard copies of permits and attachments. While taking advantage of technology, customers will also reap cost and time saving benefits. Beginning travel prior to completion of the issued permit is **strictly PROHIBITED**. There will be **NO WARNINGS**, so DO NOT ABUSE this privilege. If the use of E-permitting is abused by anyone or any company the privilege will be revoked for that individual and company. Any questions feel free to contact us at [haulingpermits@sha.state.md.us](mailto:haulingpermits@sha.state.md.us)
